Floor: 1,788 optional or 2,200 standing

ARENA RIGGING

Low steel height from finished floor is 47' | High steel height from finished floor is 72'

Rigging point weight ratings:

4,000 lb: 32 points distributed across the arena steel structure (low steel).

8,000 lb: 3 points centered on the east end of the arena directly above staging (low steel).

The facility coordinates use of riggers, load crew, stagehands, camera operators and spotlight operators in instances where the show promoter or lessee does not have their own. If the traveling production team does not include rigging personnel, the Ocean Center will exclusively manage all rigging services to ensure safety and efficiency.

Chain Motors:

Description: ½ Ton Chain Motors

Quantity: 10 units available

Use: Suitable for lifting and rigging purposes

Truss Sections:

Rigging points

- 12"x12" Square Truss Sections:**

Quantity: 31 units available
